KEY FEATURES

The Silke represents the latest TMA technology. It meets the latest MASH Crash Standards and has been specially engineered for use in Australia's harsh climate.

The good news is that the SILKE fits straight onto TMAs equipped with the previous J1-LED Julietta cushion with minimal downtime, allowing you to get back on the road quickly!

New builds are no problem either, as the SILKE integrates with the J1-LED Arrowboard/VMS Pod meaning the cushion can be quickly fitted to almost any truck available on the market.

In the event of an impact, J1-LED has depots and Service Agents across Australia to manage your repairs, swap over the cushion, and get you back out on the road.
